

Technical Information

DATE: April 29, 2015

MODEL: RCD-1570

Software Release Notes

The following document contains details of the software updates for the RCD-1570. This model utilizes two separate software modules (Main, CD MPEG) and the release notes for each are listed below.

Key:

New Feature

Feature Change

Bug Fix – Critical

Bug Fix – Minor

Main Software

V1.0.8 to V1.1.1

April 29, 2015

- **Feature Change:** Minor updates and changes to the Rotel Link feature to better integrate with the Rotel Remote App when paired with a networked Rotel product.

V1.0.4 to V1.0.8

October 29, 2013

- **Feature Change:** Revised the RS232 protocol to remove the need for model-specific prefixes to each command.
- **New Feature:** Added RS232 command `get_current_dimmer!` to get current display dim status.
- **Bug Fix (Minor):** RS232 commands to set display dimmer will now return feedback of current display dim status.
- **Bug Fix (Minor):** Fixed an issue with the front display flashing one time during the initial power on process.

CD MPEG Software

V11-08-26 to V13-07-25

July 25, 2013

- **Bug Fix (Minor):** Adjusted rotation speed (RPM) of driver motor to decrease the mechanical noise when playing some CDs.
